EDUCATION

Cao Thang Technical College
09/2022 – 08/2025
- Major: Information Technology
- GPA: 7.75 / 10

ACTIVITIES

National Informatics Olympiad Training Program – Participant.
(13/03/2023 – 18/11/2023)
Strengthened algorithmic thinking and problem-solving using C++.

College IT Workshops
(2022–2024)
Improved teamwork and technical skills through coding sessions.

LANGUAGES

- **English**: Basic communication, technical reading/writing
- **Vietnamese**: Native

CAREER OBJECTIVE

Aspiring Backend Developer specializing in Java and Node.js, with strong interest in designing and implementing scalable RESTful APIs and backend systems. Eager to apply knowledge in real-world projects, enhance performance and security, and grow with an agile development team.

SKILLS

Programming Languages	Node.js, Java, PHP, JavaScript, C++
Frameworks	Express.js, Laravel, Spring Boot (basic)
Databases	MySQL, SQL Server, MongoDB (basic)
Concepts	RESTful API, Authentication & Authorization, Middleware, OOP, MVC
Tools	Git/GitHub, Postman, VSCode
Soft Skills	Teamwork, Problem-solving, Self-learning, Adaptability, Communication.

PROJECTS

NovelNest – Online Reading Platform
(01/06/2025 – 16/07/2025)

Project Type	Graduation Project.
Description	- Built backend APIs for user authentication, content moderation, and payment integration, ensuring secure and efficient user management. - Designed a multi-role system (reader, author, admin) with secure access control. - Integrated AI summarization and TTS features.
Technologies	Laravel (Backend), React, MySQL, OAuth (Facebook & Google), Cohere AI (Chapter Summarization), Zalo TTS API (Text-to-Speech), MoMo API, VNPay API.

PixelShop – E-commerce Platform for Laptops & Smartphones
(22/12/2024 – 18/01/2025)

Project Type	Academic Project.
Description	- Developed responsive e-commerce web application with product browsing, shopping cart, and order management, improving user experience and simplifying order handling. - Designed RESTful APIs and backend logic for product and order handling.
Technologies	Laravel (Backend), React, MySQL, VNPay API, OAuth (Google).
Link GitHub	https://github.com/TellYaHeadliner/Pixel-Shop-Project

Task Manager API (Node.js + MongoDB)
(09/2025)

Description	- Built a full backend API for user authentication and task management (CRUD). - JWT-based auth, password hashing (bcrypt), RESTful structure.
Technologies	Node.js, Express, MongoDB, Mongoose, JWT, Postman
